TECHNICAL EXPERTISE

Expertise in Operating System / Tools & Technology / Languages

Languages	HTML5, CSS3, JavaScript, jQuery, .Net Core MVC, .Net Core Web API, Node js, Express js, IIS
Database	SQL, MySQL, MongoDB
Tools & Technology	Visual Studio, Visual Studio Code
Operating Systems	Windows 11
Version Control	Git

QUALIFICATIONS

The New College, Autonomous College, Royapettah, Tamil Nadu

CAREER HISTORY

Company	Technology	Designation	Duration
Zydni	HTML, CSS, Bootstrap, JavaScript, jQuery, .Net Core MVC, .Net Core Web API, Node js	Dotnet Developer	18 Feb 2021 to Till now

PROJECT DETAILS

PROJECT 1

CUSTOMER/PROJECT	Zydni Resume Portal (Internal Project)
ROLE	Backend Developer
ENVIRONMENT	.Net Core Web API, SQL, IIS
CONTRIBUTION	The process entails leveraging an API as a bridge for seamless data transfer from the frontend to the SSMS. Once the data is securely transmitted, it is deployed on the robust and scalable platform of IIS. This ensures efficient handling of the data flow, enabling smooth communication between the frontend and the SSMS, ultimately facilitating the seamless operation of the system.
DESCRIPTION	Facilitates job seekers in completing a comprehensive form, uploading their resumes, and submitting their profiles, thereby enabling the HR team to promptly contact and engage with the job seekers.

PERIOD	2 months
TEAM SIZE	2

PROJECT 2

CUSTOMER/PROJECT	Your Trailor Depot
ROLE	Backend Developer
ENVIRONMENT	.Net core Web API, SQL
PERIOD	9 months
DESCRIPTION	<p>The objective of the project is to develop a marketplace Web application. It will have all the features and functions as any PWA app would work on the mobile phones.</p> <p>Which will allow vendors to post equipment's using their dashboard so that end users can browse different equipment which are associated with different categories and hire selected equipment.</p>
TEAM SIZE	4

PROJECT 3

CUSTOMER/PROJECT	Admin Panel (CMS)
ROLE	Backend Developer
ENVIRONMENT	Node js, Express js, MongoDB
PERIOD	1 month
CONTRIBUTION	Responsible for designing and developing the backend architecture of the admin panel. Implements the necessary APIs and endpoints to handle CRUD (Create, Read, Update, Delete) operations for the different modules and dynamic content. Integrates the backend with the database to store and retrieve the dynamic content.
DESCRIPTION	<p>The objective of the project is to develop a robust admin panel and backend system that allows for easy management of dynamic content on a website. The admin panel will provide a user-friendly interface for administrators to perform essential tasks such as adding, updating, and deleting content modules.</p> <p>The project also includes specific features like request a call back, schedule meetings, subscribe to a newsletter, and apply for jobs. Administrators will be able to manage these features through the admin panel, capturing and storing relevant user data and responding to requests effectively.</p>
